The BUMA Heavy Duty

Description

We are proud to offer the BUMA Heavy Duty to further enhance the capabilities of our original BUMA. The BUMA Heavy Duty offers all of the BUMA's core features, including SD, HD and our all new UHD camera cores, H.264 compression stream, advanced DSP technology, WDR, and its distinct tube shaped design.

What truly set the BUMA Heavy Duty apart are its uniquely rugged capabilities. The heavy-duty aluminum housing is approximately twice the size of the standard BUMA, which allows for additional protection and enhanced features to be incorporated directly into the camera head. The heavy-duty head has a built-in rechargeable battery for up to 12 hours of local power independent from additional power system options, a minimum of 512GB internal solid state storage, WiFi hotspot capabilities, and two separate video streams - one that is stored locally and one that transmits to command center encoders. As an added layer of protection in areas of conflict and/or civil unrest, the heavy duty head features composite inlays and specialized glass for a ballistic resistant and explosion proof system. We make it possible to secure the most sensitive targets and the most remote, inhospitable environments.

Suggested Applications

- Bases, Outposts and Checkpoints
- Border and Port Facilities
- Conflict Zones
- Construction Sites and Pipelines
- Critical Infrastructures and Sensitive Targets
- Energy Infrastructures and Drill Sites
- Governmental Facilities
- Remote and Undeveloped Areas
